6467 N. Northwest Hwy. Chicago, IL 60631

ECO FRIENDLY CASKETS

Eco-Friendly Caskets are crafted by skilled weavers as a small cottage industry, not in factories. They are created from sustainable materials such as fast-growing willow, seagrass and bamboo which don't require heavy machinery for harvesting, giving them a small carbon footprint. Casket linings are made from unbleached natural cotton.

Willow Casket
\$1,620

BIODEGRADABLE URNS

Water burial urns are designed for biodegradable placement of cremated remains in water. The urns will float briefly to allow a final farewell before gracefully sinking. The length of time each urn takes to sink depends on the urn, the weight of cremated remains and local water conditions. The urns are designed to biodegrade quickly and naturally once placed in water, some in as little as 4 hours.

Salt Urn **\$325**

Shell Urn **\$295**

SCATTERING TUBES

Scattering Tubes are designed and engineered to simplify the scattering process. The tubes are durable, dignified and simple to use. Each features a convenient removable lid and an industry-first, perforated "push in" tab that opens easily prior to scattering. They contain no metal or plastic components and can be recycled or composted after use. Suitable for "in-cabin" airline transportation. If multiple family members or loved ones want to participate in scattering, even in multiple locations, mini-size scattering tubes allow for that option.
